DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Noguchi et al. (US 20020065335) in view of Owatari et al. (US 6095645).

Noguchi et al. teaches an image forming method and active ray curable type aqueous ink [0002], which is jetted onto a recording material by a recording head (figure 7, element 65), which selectively controls ejection of ink droplets, and is subsequently cured by irradiation of active ray [0005], comprising: a light curable type aqueous resin composition [0005] comprising a polymerizable compound [0002] which polymerizes with radical polymerization by water and active ray, and aqueous photo polymerization initiator which generates free radicals by active ray [0027]. Noguchi et al. also teaches printed matter which is produced by jetting the active ray curable type aqueous ink onto an unabsorbent recording material [0112] and printed matter which is produced by jetting the active ray curable type aqueous ink onto an absorbent recording material [0054].

Noguchi et al. does not teach a non-ionic surfactant comprising a perfluoroalkyl group in a molecule, wherein the content of the non-ionic surfactant is 10 to 10,000 ppm.

Owatari et al. teaches a non-ionic surfactant (C3, L28) that is contains a perfluoroalkyl group (C3, L64) with the content of the non-ionic surfactant being 10 to 10,000 ppm (C4, L7).

It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the invention of Noguchi et al. with the disclosure of Owatari et al. in order to provide a stable ink composition.
